COVID 19-Learner Help

Dear Parents and Learners

In the coming weeks there are many uncertainties ahead and the school wishes every learner, parent, the community and the country only the best. One of the uncertainties is whether the schools will re-open on April 16. Along with that, especially, uncertainty for the grade 12s who must prepare for their matric exams at the end of the year.

Extra measures will be taken in the form of extended school days and shortened holidays in June and September 2020. The staff at Hoërskool Lydenburg has put in a lot of effort with regard to ensuring that learners do not fall behind with their academics.

Therefore, we will be sending assistance programmes from March 31, which learners should follow carefully during the weeks ahead. I trust that everyone has the necessary discipline to complete the assignments that will be passed on. We will use Whatsapp groups, d6 (download), Facebook and the web page (www.lydenburghs.co.za). When school resumes, we can confidently tackle the new term.

I came across the following message in my diary: "In our willingness to step into the unknown, we surrender to the realm of all possibilities that the dance of the universe orchestrates." May this also be a source of inspiration to everyone.

Lydenburg regards.
